API 6A Weld Neck Flange 5000 PSI

Category: API Standard Flanges · Availability: Sourced on Order · SKU: RND-FLG-6A-WN-5000
Issued: 31 Oct 2026

OVERVIEW

High-pressure weld neck flanges sourced to API 6A for wellheads, flowlines and pressure-control equipment. The long tapered hub gives a smooth stress transition into the pipe wall, which is why these flanges are the first choice where lines are welded, pigged and pressure-tested. We source them in carbon steel A105, low-temperature LF2 and high-strength F52 grades, with RF, RTJ, 6B and 6BX facings and material test certificates available on request. Send us your size, pressure class and facing requirement and we will quote the exact flange for your line.

TECHNICAL SPECIFICATIONS

Product Name	API 6A Weld Neck Flange 5000 PSI
Category	API Standard Flanges
Standards	API 6A, ASME B16.5, NACE MR0175
Pressure Rating	2000 PSI / 3000 PSI / 5000 PSI / 10000 PSI
Material	ASTM A105, A350 LF2, A694 F52/F60/F65
Connection	RTJ / RF / BX / 6B / 6BX
Availability	In Stock / On Order / Custom Manufacturing

HOW TO ORDER

Send your RFQ through rigndig.com/request-quote, by email to admin@rigndig.com or on WhatsApp +92 333 2594493. We confirm the best price, availability and lead time — sourcing begins only after you approve the quoted price.
