API Companion Flange

Category: API Standard Flanges · Availability: On Request · SKU: RND-FLG-COMP
Issued: 04 Nov 2026

OVERVIEW

Companion flanges connect threaded pipe and tubing directly to flanged wellhead, valve and pipeline equipment — no welding needed at the joint. We source API 6A and ASME B16.5 companion flanges in carbon steel A105 and low-temperature LF2, with NPT or line-pipe threads and RF or RTJ facings, in standard and custom-machined configurations. Every flange is supplied with material certification on request. Share your thread size, pressure rating and facing and we will quote the correct companion flange for your connection.

TECHNICAL SPECIFICATIONS

Standard	API 6A / ASME B16.5
Type	Companion flange, threaded bore
Size Range	2-1/16 in to 21-1/4 in (API) · NPS 1/2 to 24 (ASME)
Pressure Rating	2,000 to 15,000 PSI · Class 150 to 2500
Materials	ASTM A105, A350 LF2, A182 F304 / F316
Facing	RF (raised face) / RTJ (ring type joint)
Thread	NPT / API line pipe, as required

HOW TO ORDER

Send your RFQ through rigndig.com/request-quote, by email to admin@rigndig.com or on WhatsApp +92 333 2594493. We confirm the best price, availability and lead time — sourcing begins only after you approve the quoted price.
